

Team Involvement in Demonstration

Date	15 March 2024
Team ID	XXXXXX
Project Name	Smart Lender – AI-Powered Loan Eligibility Prediction System
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document outlines the roles and responsibilities of each team member during the final project demonstration. It highlights individual contributions, presentation responsibilities, and active participation throughout the demonstration, ensuring that every member contributed meaningfully to showcasing the Smart Lender project.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active / Passive)
1	Yaswanth Ganesh R	Team Leader & Backend Presenter	Project Introduction, Problem Statement, System Architecture, Backend Development	Introduced the project objectives, explained the overall system architecture, demonstrated the Flask backend, REST APIs, prediction workflow, application routing, and backend processing logic. Coordinated the overall presentation flow and managed transitions between team members.	Active
2	Salma Shaik	Machine Learning & Data Science Presenter	Data Preprocessing, Machine Learning Pipeline, Model Evaluation, Performance Analysis	Explained the dataset, preprocessing techniques, feature engineering, model training process, evaluation of Decision Tree, Random Forest, K-Nearest Neighbors (KNN), and XGBoost models, and presented the model comparison reports, confusion matrices, ROC curves, and feature importance analysis.	
3	Sandhya Mondam	Frontend & Live Demonstration Presenter	Web Application Demonstration, Prediction Result, Batch Prediction, Analytics Dashboard	Demonstrated the Smart Lender web application, including the loan application form, prediction results, confidence score, AI risk factor analysis, EMI and Debt-to-Income (DTI) calculators, Charts & Analysis page, Reports Gallery, and Batch Prediction functionality using CSV file uploads.	Active

Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	Yaswanth Ganesh R
Overall Team Coordination Rating (1-5)	5/5
Communication Method	Regular meetings through Google Meet, WhatsApp, and GitHub collaboration ensured smooth coordination throughout the project development and demonstration preparation.
Any issues during demo	Minor delay was observed while processing a large CSV file during the Batch Prediction demonstration due to the size of the uploaded dataset. However, the application continued functioning correctly without any interruption.
How issues were resolved	The team maintained smooth coordination by continuing the explanation of the prediction workflow, backend processing, and model evaluation while the batch prediction completed. This ensured a continuous presentation flow without affecting the overall demonstration.
